GOOD ROADS

FAME FROM ITS GOOD ROADS

Improved Streets, Smooth and Dust-
less Highways Around Philadel-
phia Advertise City.

Good streets and smooth, dustless country roads, have been a means of advertising and giving added importance to Philadelphia, not only throughout the United States and Canada, but abroad, according to William H. Connell, chief of the bureau of highways, Philadelphia Inquirer states.

Highway experts from scores of American and European cities, as well as engineers representing practically every state in this country, have studied the progress made by Philadelphia in dealing with one of the greatest of municipal problems, that of road construction and maintenance, and

Improved Road Near Philadelphia.

have requested information regarding the specifications used, the processes followed and other data pertaining to the work as carried on in this city, Chief Connell said.

Within the limits of the city, motorists, most critical of road users, can travel for more than 150 miles by diverse routes, without experiencing the slightest difficulty. Because of the poor roads or dusty ones, the head of the highway bureau asserted. Visiting tourists, impressed by this fact, have heralded the reputation of Philadelphia as the city of good roads throughout the country, he said. The improvement, in many instances, has been made at comparatively little expense by means of surface treatments, varied to meet the demands of the occasion, he pointed out.

GROWTH OF IMPROVED ROADS

Inventions, Discoveries and Public Im-
provements Come When There
Is Strong Demand.

The history of good roads affords a striking example of the fact that inventions, discoveries and public improvements take place only when there is an insistent demand for them. In early times, when each family lived largely to itself, there was little commerce in the articles produced on the farm and consequently little need for transportation. As large cities developed the demand for roads on which products might be easily transported grew.

Two of the most recent causes for the improvement of roads have been pleasure vehicles. Twenty-five years ago the bicycle began to come into common use and the cyclists made a vigorous demand for roads on which they might ride. Unfortunately, however, paths for bicycles were constructed in many places in lieu of improved roads. The invention of the automobile, however, has meant a real step toward better roads.

GET GOOD HIGHWAY SYSTEM

Not Difficult Problem If County or
Township Is Willing to Use
Common Sense.

How to get a good road system is not a difficult problem, if a county or township is willing to be guided by common sense. The first step is to employ a competent highway engineer. He will make a study of traffic conditions, ascertain where the main market lines with a type of surfacing material that will be less expensive than that required on the main market lines, and yet will at the same time meet all traffic requirements on the feeder lines. The main lines, if built of concrete, will be permanent and cost less to maintain.

How to Place Culvert.

Where a culvert is placed in a road on a hillside to take care of the drainage collected in an uphill ditch, it should be placed across the road pointing in the direction of the flow of the steepest grade.

Changing Milk for Calf.

The time to change the calf from whole milk to skim milk depends upon the development of the calf. If it is healthy it may be changed to skim milk at the end of the second week, but the third week would be better.

FARM ANIMALS

GIVE BROOD SOWS GOOD CARE

Proper Exercise and Protein Feeds in
Winter Will Aid in Production
of Strong Litters.

(Prepared by the United States Department of Agriculture.)

If the sows that are to farrow in March and April produce good strong, vigorous litters and get their pigs through successfully to weaning time they must be properly cared for from now until the day of farrowing. One of the biggest hindrances to the sows' farrowing good strong, vigorous litters is lack of exercise. During the cold and snowy weather hogs like to lie around the sleeping quarters and be comfortable. That, however, is just what they should not do all the time, advise the specialists of the United States department of agriculture.

The proper exercise for a brood sow is that which she will take voluntarily and not through force. They should get their corn ration by hustling for it in the stalk fields and not by getting it fed around the sleeping quarters on feeding floors or in troughs. Feed them ear corn during the winter months and scatter it out in the stalk fields. The manure spreader is a good implement to use in scattering this corn. Don't be afraid it will be wasted, for it won't. You can readily regulate the amount

Pigs at Self-Feeders.

fed so that it will be picked up clean, and you will find next spring that there is not a bit of the corn lying around to go to waste.

Protein feeds in the form of shorts, tankage, oilmeal or alfalfa hay should be supplied. Self-feeders can be used for these feeds, and it is quite successful to grind the alfalfa hay. Sows will eat a larger percentage of alfalfa hay fed in the ground form than when fed in racks underground. This alfalfa is generally cheaper on the corn belt farms than any of the other protein feeds and is a good balance to the corn ration.

By following a few of these simple methods the sows will be brought to farrowing time capable of producing good strong pigs. Every hog grower knows that if he is going to have pigs that do their best from the start they must necessarily be strong and vigorous at farrowing time. The proper care of the brood sow is not difficult and should be carefully looked after by every hog grower.

SHEEP ARE MOST PROFITABLE

Produced More Economically on Farm
Than Any Other Live Stock—Pick
Up Much of Living.

Sheep, in proportion to the value of their products, are produced more economically on the farm than any other live stock; the feed and labor requirements are less. They fit in with general farming, get much of their subsistence from forage from grazing weeds and grass that would not support other stock. They eat little feed that has a value as human food, and need less grain than other animals. They add materially to the farm revenue but add very little, relatively, to the farm expense.

BRAN AND CLOVER FOR SHEEP

Nothing Better for Ewes With Lambs
During Winter Season—Supply
Best of Hay.

Feed straw, fodder and stubble grasses during the winter, but toward spring ewes with lamb should have the best of first-crop clover hay, say, one feed per day. Nothing is better for them than bran and clover hay.

BEST FEED FOR YOUNG PIGS

Skim Milk and Middlings Are Excel-
lent Just After Weaning—Feed
Four Times a Day.

Skim milk and middlings make about the best feed for young pigs after weaning. When first weaned they should be fed four times a day, giving only a small quantity each time. When well started, three feeds a day are enough.

OUTDOOR EXERCISE FOR PIGS

Animals Should Be Protected From
Cold Winds or Hot Sun—Limit
Range for Sows.

Outdoor exercise is beneficial, but pigs should be protected from cold winds or from very hot sun. If the sow is turned out with her pigs, do not give her a very large range at first, as she is likely to travel too far and unduly tire the young.

Horticultural Points

SOME COMMON LADY BEETLES

Bugs Are Among Best Friends of Plant
Grower as They Feed Upon Var-
ious Noxious Insects.

(By W. E. BRITTON, Connecticut State Entomologist.)

The beetles commonly known as lady beetles, "lady birds" and "lady bugs" or plant-louse beetles are among the best friends of the farmer or plant grower, because they feed in both larval and adult stages upon plant lice, scale insects and the small larva and eggs of other and larger noxious insects. With the exception of one species, Epi-

A, Beetle; b, Larva; c, Pupa; d, Blossom End of Scale-Infested Pear, Showing Beetles and Their Larva Feeding Upon the Scales.

lechna borealis Fabr., known as the squash lady beetle, all lady beetles occurring in Connecticut are carnivorous and predatory, feeding on the smaller insects many of which are pests of cultivated plants. Hence we call them beneficial. Dr. S. A. Forbes examined the stomach contents of 39 specimens, and found that one-fourth of their food was composed of plant lice; though they ate some vegetable food such as pollen and spores of fungi, a greater portion of their food consisted of insects.

Though many persons are more or less familiar with lady beetles, some are not acquainted with their habits or life histories, and do not, therefore, recognize them as friends.

CROPS TO GROW IN ORCHARD

Ideal Method Is Not to Grow Any Cul-
tivated Crop Between Trees—
Some Can Be Grown.

The ideal method of handling the young orchard is not to grow any cultivated crops between the trees at all. This will allow them to be cultivated both ways all during summer, which is very desirable. Carefully done, however, some of the hoed crops, like potatoes, strawberries, cabbage, etc., can be grown without injuring the trees to any great extent. These crops more than pay for the expense of cultivating the trees. Not more than three rows should be placed between two peach rows. When the trees begin to bear fruit, these crops should be left off entirely, except possibly two or three rows of peas between the peach rows.

In no case should the trees be stunted or neglected in any way by growing crops in the orchard. Such crops as corn and grain should be left off entirely as they draw heavily on the soil and rob the trees of both food and moisture.

CULTIVATE ALL FRUIT TREES

While Young They Should Be Given
as Much Attention as Any Other
Crop on the Farm.

Fruit trees respond as readily and definitely to cultivation as do garden vegetables and grain crops, and, while young, they should be cultivated with as much care as any other crop. Experiments by agricultural scientists have shown that fruits breathe, and that cold storage delays their ripening by causing them to breathe more slowly than when warm. If an orchard is given as much care as grain and other crops—if it be carefully pruned and sprayed and the ground properly cultivated, especially the first year, there will be no disappointment as to yield, both in quantity and quality.

SOME SPRAYING 'DON'TS.'

Don't forget to spray.
Don't spray just for the sake of doing something! At best spraying is only precautionary and must be applied in advance of the expected attack of pests.
Don't neglect the fertility of the soil. Plants must "eat" to live.
Don't expect the plants and trees to take care of themselves; cultivate, prune and spray.
Trees and plants are easily grown, and will make life brighter.

MUSKRAT FOR FOOD

The enormous numbers of carcasses of muskrats which are thrown away after the pelts have been removed is a waste of food. The muskrat is an animal of most cleanly habits, is most discriminating in choice of food, and is a very acceptable addition to the table.

The writer can speak from personal experience of the effect that when cooked as rabbits are cooked the meat of the muskrat is extremely palatable. As a matter of fact, muskrats are sold for food in some of the eastern markets and some hunting clubs in the East have animal banquets in which the muskrat forms the chief dish. In some places this animal is known as the "marsh rabbit."

It is to be hoped that this means of reducing the cost of living, although slight, may not be overlooked.—F. L. Washburn, Minnesota Experiment Station.

RAISING MORE BEEF CATTLE

Thousands of New Breeding Herds Be-
ing Established All Over Country
With Better Stock.

It is a fact that there are thousands of new breeding herds being established all over the country. It is also a fact that farmers and small ranchmen are using more care in selecting the heifers and cows for these new

Fine Beef Specimen.

herds and the additions they are making to the herds they already have on their farms. Better quality has been preached from every lip in the land.

The live stock journals and agricultural papers have not let up in their advocacy of pure-bred cattle for the beef herds, and the voice has been heeded.

GRUBS INJURIOUS TO STOCK

Pests Found on Backs of Cattle De-
velop Into Heel Flies and Do Great
Harm to Animals.

The characteristic lumps or swellings which may be found under the skin on the backs of many cattle from January to April contain grubs. If these grubs are allowed to remain, they will complete their growth, drop to the ground and transform to heel flies, which may reinfest the cattle during the spring and summer. The grubs weaken the cattle, cause them to fall off in flesh and milk, and decrease the value of the hide. The beef in the immediate vicinity of a grub becomes slimy and of a greenish color, and is known to the butcher as "licked beef." On an average the damage to the hides is placed at one-third their value and the loss of beef to each infested animal ranges from \$3.00 to \$5.00.

ARRANGING RATION FOR COWS

Three Things Should Be Borne in Mind
—Protein, a Little Fat and to
Supply Succulence.

The ration for the dry cow should be formulated with three things in mind, namely, to furnish a sufficient amount of protein to develop the fetus properly and allow a surplus for the needs of the body of the cow; to supply enough carbohydrates that the cow may lay on a little fat; and to supply succulence. Some kind of green feed is very essential in the ration for the cow at all times. It serves the purpose of maintaining the bowels in a loose condition, which is necessary to good digestion and assimilation of food.

COMPOST HEAP IS ESSENTIAL

Leaves, Ashes and Other Refuse Mat-
ter Should Be Accumulated for
Garden Soil.

With the existing high cost of fertilizers of all kinds it is important that every farmer have a compost heap where leaves, ashes and other refuse matter about the place can be accumulated for use on the garden soil.

GREATER than the Metropolitan Opera House; greater than Covent Garden, where the royalty of England is entertained; greater than La Scala at Milan, the Grand Opera House of Paris, and the Royal Opera of Berlin; greater in fact than all the opera houses and places of entertainment in the world, is the seventh floor of Building No. 5—the centre of a city in itself formed by the modern structures of steel and concrete that house the giant industry of the Victor and Victor-Victrola.

To this building in the city of Camden, just across the historic Delaware River from the city of Philadelphia, comes a never-ending procession of the very greatest artists in the whole world. Today it may be Caruso or Amato, and tomorrow it may be Melba, or Tetrazzini, or Schumann-Heink, or Farrar; or it may be several of them assembling to unite in making a masterpiece like the "Sextette from Lucia." Or it may be Padewski, or Kubelik, or Elman, or Harry Lauder, or Blanche Ring; and then again it might be Sousa and his band, or Victor Herbert and his orchestra.

But whoever it is or whatever the organization, rest assured that within the four walls of this building is heard, day in and day out, year in and year out, music in all its forms such as no other place on earth has ever heard.

And unlike music that is heard in any other place, which is only a momentary pleasure ending with its rendition, Victor music lives forever. From its beginning in Building No. 5, it goes through the various processes necessary to its perpetuation and eventually leaves the shipping department (Buildings Nos. 9 and 10) to be heard again and again in hundreds of thousands of homes, just as it is heard in the sacred precincts of the recording room on the seventh floor of Building No. 5.

You can hear some of this exquisite music today. Come in and we'll gladly play your favorite selections. Victrolas \$10 to \$100. Victor-Victrolas \$15 to \$300. Terms to suit your convenience.

ANNOUNCEMENTS.
For Congress.
We are authorized to announce
that HENRY R. DEMAREST
of Union County, a candidate for Congress
from the Third Congressional District, will
be the nominee of the Democratic primary to
be held in August, 1918.

There is a war on. Everybody
is naturally drafted for some sort of
service.

Moreover, peace without victory
would mean another war soon. And
one war of this kind is plenty.

As time goes on more and more
Americans realize that this is a good
war and well worth getting into.

There are 400,000 feeble minded
persons in the United States, not
counting the professional pacifists.

American soldiers are helping to
guard the channel ports. It is an
honorable post of danger and privilege.

Two million Yanks in France this
year. This nation does not propose
to grasp the German nettle with di-
fident fingers.

Now it is discovered that "three
American correspondents" were not
expelled from Mexico. Look out
for limited news!

This season the admirable young
man with the sport shirt and the
passionate socks will be missed from
his accustomed haunts. He is in a
training camp.

Some people are so constituted
that they cannot trust any person
who belongs to another political
party. Therefore we submit that
Charles Evans Hughes ought to be
made a nature in the president's of-
ficial family. Then the democrats
could most Wilson and the republic-
ans Hughes. The socialists, of
course trust nobody. It is mutual.

Pointed Paragraphs.
Some music has charms that would
drive a savage to drink.
Injustice often puts a man on the
back while justice kicks him.
A woman often says: "It's no use
talking." But she never means it.
Some would be more likely to take
hints if they could pawn them.
Any chronic borrower soon begins
to wonder why everyone he knows
is so poor.

One said I'm a man says that the
art of love making is usually taught
at night school.

When the right young man calls
with an engagement ring the girl
in the case extends to him the glad
hand.

Love is a sweet dream, but the
first time a young man sees his best
girl with her front hair done up in
curl papers he is apt to wake up.

Victrola owners are the most ex-
citing and the most useful of the most
pleased and useful of people in the coun-
try, the same as they are the world
over. Join them, and you will know
why. See and hear these instru-
ments at Roark's before buying any
machine.

Roark will accept Liberty Bonds
at full face value on any selection of
a Victrola.

Beloved Woman Enters Rest.
Sarah Drake, wife of Mr. H. H.
Haviland, died at her home on
Campbell street at 2:30 o'clock last
Thursday afternoon, following an
illness of some months from a com-
plication of troubles, and for the
past several weeks there had been
no hope of her recovery. Our city
has lost one of its most loved women
as her devotion to her church, her
husband and her many friends was
most worthy and constant. Funeral
services were held at the Methodist
church at 2:30 Friday afternoon,
conducted by the pastor, Rev. W.
C. Frank, who was assisted by Rev.
G. P. Dillon, of Madisonville, Ky.,
formerly located here. A large
gathering of relatives and friends
was impressed with the service, and
interment was made in Evergreen
cemetery.

You can get any other machine
you want, at any time, but you will
keep the Victrola forever, when you
get it. Better wait for the one you
want, and which so many people all
over the world want, that deliveries
are behind the demand. Roark ex-
pects liberal shipments soon, or or-
ders placed many months ago.

Man Power.

They're talking now of drafting
men whose years have numbered 50;
and hope springs in my breast again,
the prospects now seem nifty.
They've barred me out because I'm
fat and deaf and bricked winded; and
rules responsible for that I hope will
be rescinded. When first we broke
into the game, Apollos were demand-
ed. "We do not want the old or
lame"—the officers were candid.
"No man is fit to chase the Hun un-
less he's like Narcissus." And so I
dropped my sword and gun, and
went home to the missus. "They're
mighty choice," said Jane, "my lad,
to turn down bevy writers; but wait
a while, and they'll be glad to get
such deadly fighters." And now it
seems that Jane was right; the ser-
geant's growing thrifty, and he ad-
mits a gent may fight who gives his
age as 50. And pretty soon the fat
and bald, the spavined and the
sweated, will from the parts of
peace be called, by Uncle Sam sub-
poenaed. For paths of peace I care
no hoot, I burn with martial ardor;
I long to slay the kraut fed 'lent and
confiscate his larder. Let down the
bars! Let every skate who wants to
fight go fighting, though he may
score three hundredweight, as I do
at this writing! WALT MASON.

Sharp Practices Cannot Endure.

For eight years we have been distrib-
uting Victrolas in Muhlenberg, and our faith
in them is much stronger now than
when we secured the agency, for the decision
reached then, after an exhaustive study of
all machines on the market, led us to the
Victrola, and its performance has given
most complete satisfaction to every pur-
chaser, so much so that from first to last
machines sold by us are in the hands of
the original purchasers. The field is en-
larging rapidly, and in time practically
every home will have some sort of ma-
chine. It is to our interest, and to the
vital interest of every buyer, that most thor-
ough investigation be made in the selection
of this item. We have at all times a
representative stock of instruments and
records, and gladly give public demonstra-
tions. Records of all machines will be
played, and the most thorough investiga-
tion and comparison of both machines and
records should be made by you, and are
invited by us. No sharp practices have
ever been used by us in making sales, and
we will not resort to trickery, "double-
decking" of records in the making of "dem-
onstrations," and other hoodwinking acts
and statements followed by some dealers.
Everybody gets a square deal from us,
before and after a sale, and we refer to
our large family of Victrola users, our best
incentive and greatest asset in the contin-
ual enlargement of this branch of our
establishment. Very truly, yours,
THE J. L. ROARK ESTATE,
Orin L. Roark, Manager.

Lyons & Healy Pianos

NEW AGENTS ARE PLACED AT WORK

Now at Labor in Thirty-Three
Northern and Western
States.

LARGE INCREASE IS NOTED

Part of National Plan to Augment Pro-
duction and Conservation of Food
Supplies to Meet War Emer-
gency Needs.

(Prepared by the United States Depart-
ment of Agriculture.)

More than 700 county agents and
emergency demonstration agents are
now at work in the 33 Northern and
Western states. The increase in agents
since emergency appropriations be-
came available was more in two
months than the average yearly in-
crease during any of the past four
years.

County agricultural agent work is
conducted by the United States de-
partment of agriculture in co-operation
with the various state agricultural
colleges and local organizations rep-
resenting the farmers of the county
in which the agent is located. The
county agent is usually selected by a
committee representing the county or-
ganization, on recommendation of the
county agent leader at the agricultural
college. There is at present an unusu-
ally great demand for men qualified
for work of this kind to carry out the
plan, adopted under the food produc-
tion act, of employing an emergency
demonstration agent for every agricul-
tural county in the United States not
having a regular county agent. This
is a part of the national plan to in-
crease the production and conserva-
tion of food to meet the war emer-
gency needs.

Agent in Each County.
Organization of new counties is
rapid, especially in states of the cen-
tral West, several of which have given
an assurance that there will be a
county agent or county emergency
demonstration agent in each of their
counties by February 1.

Malne, New Hampshire, Massachu-
setts, Connecticut, Rhode Island and
Delaware already have an agent in
each county, while New York, Indiana
and Pennsylvania are almost com-
pletely covered. Nearly half of the agri-
cultural counties in the Northern and
Western states are now being served
by a local demonstration agent, and
the indications are that the country
can be completely covered before the
beginning of another crop year.

One of the most gratifying features
of the organization campaign in the
Northern and Western states thus far
has been that most counties taking up
the work are arranging for it on a per-
manent basis—many of them making
plans for periods of three years.

Must Have Thorough Training.
The qualification requirement of
agents are somewhat different in the
various states. Graduation from an
agricultural college is not in all cases
required, though training substantially
equivalent to a four years' course
at such college is usually insisted upon.
A considerable amount of farm
experience is a universal requirement,
and it is preferable that some of this
experience should be secured since
completing the college course.

Additional information in regard to
county agent work and the organiza-
tion of farm bureaus can be had by
writing to your state agricultural col-
lege or to the United States depart-
ment of agriculture, Washington, D. C.

CHARACTERISTICS OF A RAM
Male Should Be Selected With Refer-
ence to Ewes in Flock—Proper
Proportions.

A ram should be chosen having all
the characteristics of the breed he rep-
resents, and showing character. He

should also be chosen with reference
to the ewes of the flock. If the ewes
are large and coarse, the ram should
be small and compact. If the ewes
are small and compact, the ram should
be of a larger type.

FATTENING FEED FOR FOWLS
Cornmeal, Middlings, Beef Scrap and
Ground Oats Are Said to Be
Advantageous.

A good fattening ration for poultry
is two parts cornmeal, one part each
of middlings, beef-scrap and ground
oats, with the hulls sifted out. These
meals should be thoroughly mixed, wet
with milk and fed to the poned birds
three times a day. Usually, it is not
profitable to keep birds in the fatten-
ing pen longer than three weeks.

For months Roark has advised
buyers to secure Victrolas and re-
cords before the raise in prices. And
the raise came May 10, but is
much less than was anticipated, the
average on machines and records
being only about 5 per cent. So
Victrolas are still the cheapest thing
you can buy, and, always, have and
will be the best.

Children's Diseases.

Most persons outside of the medi-
cal profession think of measles, scar-
let fever and a few other similar dis-
eases as afflictions of childhood,
and are astonished when epidemics
of them occur in the army camps.

The truth is that these diseases
are extremely contagious and that
the human organism is especially
susceptible to them. In thickly
settled communities nearly everyone
catches them during his childhood.

The same thing used to be true of
smallpox, and in the tropical regions
of yellow fever, until health officials
from the United States, and others
instructed by them, drove it away
never, let us hope, to return. Now
smallpox attacks adults chiefly be-
cause most children are protected
by vaccination. The effect of vac-
cination wears off in some cases, and
therefore the person may contract
the disease in later life.

A person who has not had measles
or scarletina in childhood is very
liable to take it in adolescence or in
adult life, if he is exposed. That
is why measles has made such rav-
ages among our troops in the canton-
ments. The adult unprotected by a
previous attack is, however, not
quite so liable to catch the disease
as a child is, for he has probably
escaped because he possesses a natural
immunity, if he is fortunate enough
to have such a protection against
contagion, he may be exposed over
and over again without being attack-
ed. Had it not been for instances
of natural immunity, the great epi-
demics of black death in the Middle
Ages would have exterminated the
people of invaded cities, except for
the very few who recovered from
attacks.

The principle so called children's
diseases—the doctors call them the
exanthemata, which means eruptive
diseases—are scarlet fever, measles,
German measles and chicken pox;
whooping cough and mumps are also
diseases of childhood, though they
do not belong in the group of the
exanthemata. Smallpox belongs to
the group, but vaccination has re-
moved it from the usual list of chil-
dren's diseases. The child who has
passed through all of those without
 mishap is to be congratulated, for
he has been freed of a menace that
would otherwise hang over his latter
years. That night, when circum-
stances were favorable, make him an
involuntary agent in the spread of a
fatal epidemic.

Get a fly swatter or three from
Roark.

Lincoln Chautauqua, with a great
program, will draw large crowds to
Greenville June 20-24.

Furniture polish, guaranteed by
Roark, gives greatest satisfaction.

Nation-Wide Preparedness

North, South, East, West—all working to put
the Nation in fighting trim!

Army and Navy departments and districts,
camps, yards, coast-guard stations, light houses,
munition, construction and textile plants—all co-
ordinating to mould the vast organization into an
effective homogeneous force! And in this enor-
mous task the country's telephone network has
been and will continue to be the great indispen-
sable agent of communication.

The Bell system has enlisted every resource
at its command and offered all unreservedly to
the government.

This, together with the immensely increased
commercial demand for service, the general short-
age of materials, and the enlistment and draft of
a large number of technically trained employees
who cannot be replaced, will, it is hoped, be borne
in mind by every loyal American if there should
later result the necessity for subordinating private
convenience to the pressing needs of the govern-
ment.

We are not sitting idly by and waiting for a
bright day when our money can buy equipment.
We are using every means at our command to
keep our service up to its usual high standard.
You will want to help because you will be helping
your own service and enabling us to do a better
job for Uncle Sam.

We appreciate co-operation.

Local Mention.

The White is King.

Red Cross Week, May 20-27.

Greenville Chautauqua, June 20-24.

Remember this is Red Cross Week—and remember it liberally.

Some special wallpaper bargains at Roark's.

War gardening gives one a peace appetite.

Get wall paper at Roark's and save money.

Don't do your bit and quit, but do your best, then rest.

Sewing machines, needles, supplies of all sorts at Roark's.

The season ticket sale for our Chautauqua will be started soon.

Roark for pianos, Victrolas, records, cabinets.

Have E. N. Martin do your pressing and clothes repair work.

Nobody is too poor to buy thrift stamps and nobody is too rich.

Small rooms can be papered at half from Roark's remnants.

Miss Amy Longest, who has been in Atlanta for some months, has returned home.

Brand new Ford touring car for sale. Apply to Harry Wilkinson, at Fred & Lewis store.

Next Monday is county court day, and the usual large crowd is expected.

Buy the best value in America piano, the Lyon & Healy, from Roark, county distributor.

Stamp collecting has come back strong, and it's war stamps that are being gotten together, now.

Several one room patterns of wall paper at Roark's are offered at cut prices.

We have had enough rain the past week to have raised a crop, if it had been supplied at needed times.

Second hand Ford Touring Car for sale. Price \$275.00. W. C. Johnson, Greenville, Ky.

Mrs. C. E. Roark, who has been teaching in the Central City high school, is now at home here.

Comparisons are educative—so Roark's Victrola business has quadrupled the past year.

You are not worth anything, unless you are doing something for your country.

Many new records can now be found at Roark's, in Victor shipments of the week.

Many people who are not wearing a Liberty Loan button are tagged as big as a wash pan by the public.

There is not a talking machine made which will not play Victor records, and Roark has a great supply.

Not so much idle war talk around here, lately—noticed it? There would be silent spots and vacant spaces, if it had not stopped.

The remnant clearance sale of wallpaper by Roark offers some excellent rooms at most attractive prices.

The heavy rains the latter part of the week did considerable damage to low lands, and considerable replanting will have to be done.

Mrs. E. N. Martin is prepared to do all kinds of ladies tailor work in best manner.

Get fly swatters at Roark's and start the campaign at once.

Service Flag Dedicated Last Sunday.

A service flag was dedicated at the Methodist church last Sunday morning. Mr. Geo. Eaves made the presentation speech, and acceptance on the part of the church was acknowledged by Mr. Newton Hiecher both talks being received with great satisfaction. Rev. W. C. Frank the pastor, delivered a strong sermon, full of appeal and patriotism. There are 27 stars on the flag, and this is said to be in Muhlenberg.

Don't neglect your school and city taxes this week, or you will have to pay a penalty.

Victrolas stay sold, and give the buyer no trouble. See Roark and arrange for one.

Memorial Day should be made a memorable occasion this year above all others.

The largest stock of talking machine records to be found in this part of Kentucky can be found at Roark's.

Water in the lake is rising to a point of satisfaction, and with careful use, and anything like a normal season, we will have plenty of water.

Look at Roark's stock of chairs and rockers—greatest in county.

Our Lincoln Chautauqua begins June 20, two days later than first announced. A great program has been prepared.

"Over the Top" for the Red Cross this week, just like patriotic old Muhlenberg has always done. And be sure you do your part to help.

The Victrola, with many exclusive features, is supreme. A demonstration convinces. Roark will be glad to meet any test.

The quicker we stop the traitors at home, the sooner we will stop the Germans abroad. And we must use the same method in bringing about the stoppages.

Silent, swift, simple, strong, the White is the greatest sewing machine on the market. Full line on the floor at Roark's, and you are asked to see them.

Street cleaning and dressing up around the homes of the town continue at a gratifying rate, and we have never been so sanitary or looked so well.

Money don't count, now. Get to work and produce something, or hide away at home, and don't interfere with folks who are doing things, or the officers will get you, sure.

Join the large and happy family of Victrola owners. Best of the kind, beyond doubt, and nothing can give the same lasting satisfaction to the whole family, and the cost is slight.

Wm. Bradley, a well known colored man, died at his home here last Saturday night, after an illness of some time from tuberculosis. He is survived by his wife. Interment was in West End cemetery Monday afternoon.

Worm gears, with ball-bearing points, the Victrola motor surpasses the bevel-gear motors in other machines to same degree it does in every other feature.

Mr. C. W. Taylor returned last week, after spending several weeks with her daughter, Mrs. Mary Martin, in New York. Mrs. Martin is a Red Cross nurse, and expects to sail soon for France.

The finest instruments ever built by the Lyon & Healy daylight factories are now assembled on our floors. In point of tone they are a delight—and a full five years ahead of ordinary pianos. See and test them. Roark.

Roark's, Greenville, Ky.

See and try, and you will buy the White sewing machine from Roark.

FIELD DAY HUGE SUCCESS

Great Crowds View Experiment Field and Hear Rousing Addresses Yesterday.

Field Day at the Agricultural Experiment ground yesterday was an unbounded success, in weather, attendance and results sure to follow. Hundreds of horses, buggies and cars were parked around the grounds from beginning to end. The addresses were given closest attention and especially did Bishop Woodcock, of Louisville, arouse the enthusiasm of the immense crowd by his wonderful address on the Red Cross.

Visitors were taken over the field, preceding the speeches, and everyone expressed the deepest interest and greatest admiration of the work being done under Supt. Early Ewan. Carloads of farmers from Daviess, Hopkins, McLean, Henderson and Christian counties were in attendance, and not any section of Muhlenberg but was represented. Such days are bound to bring great benefits.

The Red Cross ladies served lunch, and also secured a large number of new members to the order. It was a patriotic, helpful meeting, and will become an annual affair.

Our Future Rulers.

The millions of young men who are offering themselves to save the world, are going to rule it when they come back victors. The slacker is on the despised list, now, but in time to come he will be an utter outcast—socially, politically and commercially. Look back on the people who went through or dodged the war between the States, and you will get just a faint impression of the conditions which will follow this war. Every true person left at home has the deepest admiration for the boy in arms, and every one of them is going to be drawn close to his mates, and when they return to the walks of civil life they will be much better equipped than when they left us, for they are learning along all lines, every day. Their return will be glorious, and their welcome will be lasting, so look out for the boys to win in a streak when they resume their station in civil life.

The New Dog Law.

The dog law passed by the last Legislature, and becoming effective on the first of January, 1919, is one of the best that has been passed in any State. Every dog in the State must be licensed, and wear a tag. If any dog is seen off the premises of its owner between the hours of sunset and sunrise, it may be killed. All the provisions of the bill are just, and will tend to the extermination of the dog, which is now recognized as useless, expensive and in fact a menace.

Card Of Thanks.

The true spirit of love and friendship, as manifested during the illness of my wife, and at her passing, has impressed me beyond expression, but my thanks and good wishes are extended to each and everyone of the many who helped and comforted us. May divine blessings rest upon you.

H. H. Haviland.

Under the new law, all men who have become of age since the war was started will be required to register on June 5. It is estimated that there will be 800,000 registrants.

All subject to this new order will register with the County Exemption Board from the entire county.

Dr. L. P. Moore, who is taking a special course in surgery in Chicago, spent the week end at home on business.

Next Thursday is Memorial Day and its observance will be more general this year than ever before.

Study Will Save Sorrow.

More than in any other item, prospective buyers should make a close study of the talking machine field, for very few people know much about such articles, and it is too important to jump into the game. In presenting the Victrola, Roark publicly and privately urges people to see and hear all machines, as no other course is safe. Comparisons are educative, and the buyer should avail himself of every opportunity for investigation, not only of the machines but by interviewing owners of machines, and getting the complete record of service delivered. The purchase price is the first payment on some instruments, as repair bills are frequent and expensive.

Hartford Boy Making Good.	
News has just been received here of the recognition given Capt. Douglass Duncan Felix, of Hartford, who has been associated with Maj. Gen. E. H. Crowder, Provost Marshal General, in his office in Washington. His record there was so excellent that he has been sent abroad, and "somewhere in France" is Acting Judge Advocate of a brigade of artillery. Douglass is well known here, where he has made frequent visits to his relatives, and his many friends are proud of his record.

Most for your money in a Victrola. Cut prices show a weakness in the goods and any machine except a Victrola can be bought by anyone at a reduced price.	

Roark's, Greenville, Ky.

"The Orphans of Evian"

500 every morning! 500 every afternoon! Broken old men, sick old women and starving little children, mostly orphans.

Thus do the refugees come through the little French border town of Evian, back from the Prussian-blasted districts of Northern France.

Useless to the slave-driving Huns are these wrecks of humanity—but to France they are just another burden of war. Do you sense the "charity" of Kultur?

The "Orphans of Evian"! Poor little kiddies! So thin, so lonely, so frightened after nearly four years under their German military masters.

But wait, Red Cross nurses will take them in charge; your Red Cross—our own noble American women! Yet even from them the children shrink away filled with the old terror of Prussianism. And then the wonderful thing happens. Somebody says to them in French—"La Croix Rouge l'Amerique!" The American Red Cross! What a transformation! They weep with joy, for all have heard of the good ladies of the Red Cross.

The children are washed, clothed, fed, doctored and then sent into France, shrilly crying as the trains pull out, "Vive l'Amerique! Vive la Croix Rouge!"

And that's only one of the many things your Red Cross dollars are doing. Now isn't that a glorious use for just hard cold dollars!

Millions of loyal Americans will pledge a part of each month's earnings during June, July, August and September.

What Will You Do To Help?
Red Cross 2nd War Fund May 20-27
\$100,000,000 must be raised in America in one week

Every cent given to Red Cross War Fund goes for War Relief.

The American Red Cross is the largest and most efficient organization for the relief of suffering that the world has ever seen.

It is made up almost entirely of volunteer workers, 10,000,000 unselfish Americans.

It is today bringing relief to suffering humanity, both military and civil, in every war-torn Allied country.

It is there to help our soldier boys in time of need.

By helping the starving women and children in the ruined districts of France and Italy it performs a distinctly military service. A soldier who knows that Red Cross is helping his family fights with renewed spirit.

Thus does Red Cross help to win the war. Congress authorizes it.

President Wilson heads it.

The War Department audits its accounts.

Your Army, your Navy, and your Allies enthusiastically endorse it.

Twenty-two million Americans have joined it.

To Help Win The War
This Space is Patriotically Donated by
W. H. BRIZENDINE & CO.

Voluntary Call For Specially Qualified Men.

"Voluntary" calls for specially qualified men from this State are announced as follows:

Call No. 506 for railroad brakemen, firemen, and conductors to report to Commanding Officer of Engineers, Washington Barracks, Washington D. C. Only white men and men physically qualified for general military service are wanted under this call.

Call No. 539 for hostlers and stable-men to report to Commanding Officer Veterinary Corps, Camp Lee, Petersburg, Virginia. Only white men and men physically qualified for general military service are wanted under this call.

Call No. 541 for twenty-five mule packers to report to Commanding Officer Quartermaster Corps, Camp Joseph Johnston, Jacksonville, Florida. Only white men and men physically qualified for general military service are wanted under this call.

Call No. 535 for brick-layers to report to Commanding Officer Signal Corps, Aviation Mobilization Camp, Fort Wayne Michigan. Only colored men physically qualified for general military service are wanted under this call.

Call No. 536 for telegraphers and helpers to report to Commanding Officer Signal Corps, Aviation Mobilization Camp, Fort Wayne, Michigan. Only colored men physically qualified for general military service are wanted under this call.

Men may volunteer until May 25, and must be in uniform by June 1, 1918.

Henry F. Rhodes
Major Gen. U. S. A.
Chief Selective Service Dept.
Kentucky.

DAIRY FACTS

ENORMOUS WASTE IN WINTER

Minnesota Dairy Expert Makes Startling Statement as to Amount of Milk That Is Wasted.

Three and one-half billion pounds of milk are practically wasted in the dairy states every winter. This makes 21,000,000 pounds every day. The foregoing is a startling statement, but R. M. Washburn of the division of dairy husbandry, Minnesota College of Agriculture, says it is true. The farmer feeds most of his skim milk to hogs. This milk, fed to hogs, produces only 20 per cent of its energy value in edible pork. Eighty per cent of its energy value is lost. Mr. Washburn says, though, that some milk is necessary to start pigs off strongly.

Much more of the energy value of the skim milk will be saved if it is made into cottage cheese. Every 100 pounds of skim milk, says Mr. Washburn, is equivalent to 20 pounds of ordinary meat, and will make 15 pounds of cottage cheese. The cheese contains about one-third more protein and one-third less energy than meat, and is therefore essentially equivalent to meat.

DEVICE ON BUTTER SCALES

Resilient Support Absorbs Most of Shock When Tub Is Thrown Hastily on Platform.

The Scientific American in illustration and describing an attachment for scales, invented by P. D. Shea, 164 Chambers street New York, says:

This device is adapted particularly for the weighing of butter. It consists of a resilient support secured to the platform of the scales, which will absorb most of the shock when a tub of butter is thrown hastily thereon.

Attachment for Scales.

thus relieving the scales of jar and making it possible to ascertain the weight of a tub of butter more quickly.

OPEN SHED IS SATISFACTORY

Experiments Conducted by Department of Agriculture on Government Farm at Beltsville.

(Prepared by the United States Department of Agriculture.)

In experiments at Beltsville, Md., by the bureau of animal industry, United States department of agriculture, a warm barn, commonly deemed essential for large milk production during the winter months, proved to be somewhat less satisfactory than an open shed. Experiments extending over three years showed that cows housed in the open shed consumed a little more feed, required more bedding and slightly increased labor cost, but because more milk was produced and on account of the lower cost of housing, the open shed was found to be somewhat more economical.

BEST GRASSES FOR PASTURE

When Sowing Make Up Mixture So That Some of Plants Will Be Growing at All Times.

It is possible for pasture to be so scant that the cow uses up all her energy in securing enough nutrients from it to maintain her body. When sowing for pasture make up a mixture of grasses such that some one of the grasses will be green and palatable at all times of the growing season.

REAL SUCCESS IN DAIRYING

End Can Be Brought About By Partnership Between Good Cow and Intelligent Feeder.

Real success in dairying comes from a partnership between the good cow and the good feeder. Many a good cow fails because never given a chance to prove her ability. If one would be a successful dairymen he must study the business, learn how to know cows and how to feed them.

Building Up Dairy Herd.

A good dairy herd is built up only after years of constructive breeding and selection. To sell these herds for beef would be to undo much of the effective work which has been done.

Keep All Milk Cows. Don't dry up the milk cows. They are going to be scarce and high priced next year.

PATRIOTISM ON THE AMERICAN FARM BACK TO THE LAND

"We can count to the almost degree on the patriotism of the American farmer," Herbert Hoover said in a recent conference with Food Administration workers of the different states. This was the message brought back by the Kentucky representative who attended the conference.

Food must first be raised before it can be sent to American soldiers abroad and their English, French, Belgian and Italian associates in war. The only people who can raise food in large quantities are the farmers, and the Kentucky soldiers at Hattiesburg and Camp Zachary Taylor are counting on the folks back home producing the largest food crop in the history of the state.

People who live in cities and small towns in Kentucky are asked to help win the war by raising their own backyard gardens. Every time a city family raises a bushel of beans in a garden the Food Administration is enabled to take a bushel of beans from the farm and send them to Europe. Gardeners are urged to raise enough beans and potatoes to last all next winter, and to store them on their own premises. The Food Administration announces that the entire country east of the Mississippi River would have been short of potatoes this last winter except for this home supply raised in gardens last year, but because they were raised in gardens potatoes today are plentiful and one of the cheapest foods in the market, and every one should use them freely. The man who can raise a garden this year, and does not do so, will not only fail to help win the war, but will be in actual danger of himself suffering for food next winter.

—Save Food.—The Food Administration announces to the people of Kentucky that there will be sugar for canning this year. Those who need sugar for canning have only to apply to their County Administrators at the canning time, who will give them certificates entitling them to purchase in necessary quantities.

—Save Food.—During the next four months America will be shorter of wheat than anything else. Lessening of wheat consumption is a military necessity. We have less than a bushel apiece which must be made to last until about July 1st. Saving wheat is war work, and the man or woman who wastes wheat is in the class with the Russian Bolshevik who destroyed ammunition and enabled the Huns to make their invasion of Russia a holiday affair.

—Save Food.—

The campaign for additional signatures to the Household Ration Card is progressing throughout Kentucky. About 200,000 women have signed, but 300,000 have not, and the campaign will continue until every one of the 300,000 have either signed or positively refused to do so. In some of the counties the newspapers are printing the names of those who sign. In those counties everybody knows that those whose names are not printed are not trying to win the war, and are not good Americans.

—Save Food.—Food Administration workers in every county are taking the names of those who sign and those who do not sign. Copies of these names will be kept in each county, in Louisville and in Washington. Soon this record will be complete, and the children of the future generations of Kentuckians will be able to tell 100 years from now whether their grandparents were good Americans or selfish slackers.

—Save Food.—In an interview today, Fred M. Sackett, the Federal Food Administrator for Kentucky, said that the active co-operation he was receiving from the people of the state in all the efforts which the Administration at Washington was making to insure adequate supply of foodstuffs and equitable distribution at fair prices, was intensely gratifying. In war times prices of all foodstuffs are high, yet high prices induce large production, and it is a quantity of food that this country needs today. Whatever sacrifice of personal gain is being made by our people who produce our needed food, is but the tribute of the man and woman at home to our boys who have gone from every community to fight for our freedom and our liberties.

—Save Food.—

Roark's Greenville, Ky.

The tones on a Victrola spring and mingle as on no other instrument. The light weight on the needle does away with the gritty, grabby, scratchy noise so manifest on all other machines, and insures the supreme delights of music, song and story. See and hear at Roark's.

Merchants of Greenville are wide awake and seeking increased business. Trade with them in confident assurance of best goods at lowest prices.

The Victrola, at home and abroad, outdoes any instrument, many times over, and comparisons will surely show you why. Roark will gladly demonstrate.

THE KITCHEN CABINET

The grasses whisper to the wind, The maples to the rain; Light-footed spring goes whispering In meadow and in lane.

SOME GOOD DISHES.

A dessert which is not at all common, but which is most tasty is the following: Cut up one orange or a tangerine, add two chopped apples, sprinkle lightly with sugar. When serving mix and arrange a slice of lemon jelly thickened with grapefruit on the top of each. Serve with sugar and cream.

Lemon Jelly, grapefruit and a few chopped walnuts is another combination which may be molded and sliced; then serve with whipped cream or cut in cubes and serve in sherbet cups with a little ice cream for garnish.

Tomatoes Stuffed With Green Peas.—Take half as many crumbs as tomatoes. For a cupful of crumbs mix a fourth of a cupful of any sweet fat melted. Fry a slice of onion and half of a shredded green pepper in a little of the fat and arrange in layers in a baking dish, leaving the crumbs on top. Bake twenty minutes and serve hot.

Stuffed Tomatoes.—Take small-sized tomatoes, fill with the following mixture: Boiled rice, chopped nuts and a seasoning of salt and pepper with a little fried onion. Fill the tomatoes and bake slowly one hour. Serve with a sauce from the pan which has been slightly thickened with flour. The centers of the tomatoes may be used in a salad or in various ways which will occur to the cook.

Cabbage With Meat.—To eke out a small amount of meat and make a satisfying meal shred half a cabbage, crisp it by letting it stand an hour in cold water, then drop into rapidly boiling water and cook for twenty minutes; drain and press out the liquor. Put into a baking pan, a layer of the cabbage then a layer of any chopped meat, place a few pieces of tomato, the firmer pieces taken from the can, over the meat, season well with salt and pepper and repeat, leaving a layer of tomatoes on top. Cover with buttered bread crumbs and bake in a moderate oven for one hour. Any cold leftover cabbage may be used in this way. Dried peas, which have been quickly dried when they were tender and sweet, make a most delicious addition to the menu. Soak them until soft and use as a vegetable or soup, or in combination with other foods.

Nellie Maxwell

CAREFULLY LOOK OVER SEED

Corn Should Be Graded Before It Is Shelled to Secure Uniformity in Size and Shape.

(Prepared by the United States Department of Agriculture.)

Shelled corn is not easily graded and all seed corn should therefore be looked over carefully before the ears are shelled. The grading is done to secure uniformity of size and shape in each lot of kernels, so that they will be dropped evenly from the corn-planter when it is set for special lots of seed.

If the seed ears vary as to size of kernel they should be separated into two or three grades, according to the type of grain they bear. These grades should be shelled separately—always by hand and not by a mechanical sheller—and then tested in the corn planter. After finding the numbers on the planter plates which drop the kernels most uniformly, each lot should be numbered with corresponding figures. All this should be done when work is slack in the winter and before the spring rush begins.

Be sure there is enough for two years' planting. You may need it yourself if the first planting is drowned out; and there never was a time when there was not a demand for seed corn known to be good.

WHEAT HARVESTS OF THE WORLD

WINTER CARE FOR CHICKENS

Where Hens Are Compelled to Use Energy in Fighting Cold They Will Not Produce Eggs.

Keep the hens warm and comfortable, yet provide enough ventilation to keep the air pure, for a hen that must use her energy in fighting the cold cannot put the same energy into egg production.

STYLE XVI VICTROLA, \$215

The Aristocrat of the Victor Family

Its very appearance suggests culture and refinement—the kind of instrument you are proud to have in your home—to have your friends see—that brings you prestige and their respect.

To appreciate its individuality and wonderful tone reproducing qualities it must be seen and heard in comparison with all other models. Artistic---made from choicest woods---beautifully finished---it enters the finest homes to delight and entertain. To own one is to know complete satisfaction.

GREENVILLE, KENTUCKY

The Victrola is a good friend of the invalid

If the Victrola did nothing more than help to pass the time, it would still be worth while in the sick room.

But it does more than that—it cheers the invalid and helps toward a more rapid recovery.

The portable sizes of the Victrola are to be had at \$15, \$25, \$40, \$50; the cabinet styles from \$75 to \$400. Easy terms can be arranged if desired.

Stop in and we'll gladly demonstrate the Victrola and play any music you wish to hear.

LIVER DIDN'T ACT DIGESTION WAS BAD

Says 65 year Old Kentucky Lady, Who Tells How She Was Relieved After a Few Doses of Black-Draught.

Meadowville, Ky.—Mrs. Cynthia Higginbotham, of this town, says: "At my age, which is 65, the liver does not act so well as when young. A few years ago, my stomach was all out of fix. I was constipated, my liver didn't act. My digestion was bad, and it took so little to upset me. My appetite was gone. I was very weak... I decided I would give Black-Draught a thorough trial as I knew it was highly recommended for this trouble. I began taking it. I felt better after a few doses. My appetite improved and I became stronger. My bowels acted naturally and the least trouble was soon righted with a few doses of Black-Draught."

Seventy years of successful use has made Theodor's Black-Draught a standard, household remedy. Every member of every family, at times, need the help that Black-Draught can give in cleansing the system and relieving the troubles that come from constipation, indigestion, lazy liver, etc. You cannot keep well unless your stomach, liver and bowels are in good working order. Keep them that way. Try Black-Draught. It acts promptly, gently and in a natural way. If you feel sluggish, take a dose tonight. You will feel fresh tomorrow. Price 25c. a package—One cent a dose.
